-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1724

1. Applicant's election without traverse of claims 1-4 and 25-28 in the reply filed on May 31, 2005 is acknowledged.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 and 25-28 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,802,984 to Perkins et al. Perkins et al. teach a process and show a system for treatment of water. Referring to Figure 5, the process comprises providing contaminated water to an intermediate tank T<sub>2</sub>, combining the contaminated water stream with a portion of water that has been treated with ozone, and injecting ozone into the combined water stream by means of a venturi. It is known that venturi injectors operate by effecting a reduction in fluid pressure to provide a pressure differential as recited in the instant claims. The method further comprises delivering the water to another tank T<sub>3</sub>, which would inherently further reduce fluid pressure in the water stream. The system shown by Figure 5 of Perkins et al. comprises means for introducing contaminated water to intermediate tank T<sub>2</sub>, wherein the tank provides means for combining the contaminated water with treated water; a venture injector for causing a pressure differential for effecting introduction of ozone into the water; and a

tank T<sub>3</sub> that is patentably indistinguishable from a "motive means" as recited in the instant claims.
